

All web sites designed by Brand Attention are of the highest quality and comply with W3C accessibility guidelines up to Level AA. Your site is there to promote and enhance your brand and business, so our user interface is always clean, intuitive, and easy for users to navigate.

### Built on strong platform - .NET V2.0 framework

Our specialists in web development are experts in CSS, XHTML, .NET V2.0 Framework and MSSQL and we have PHP programmers for smaller projects that don't require full database integration.

### Standards compliant CSS & XHTML

Brand Attention insists that CSS and XHTML coding used on all clients websites comply with international guidelines set by the World Wide Web Consortium. Accessibility for all, including the disabled or partially sighted, is the key to a good browsing experience and is now a legal requirement for all UK websites.

### Web-based bespoke CMS solutions

Many clients prefer to leave all their web maintenance to us but, for those who want a hands-on role in updating information, Brand Attention offers the flexibility of bespoke Content Management Systems (CMS). Company staff can use our software with the minimum of training, and never need to learn HTML or other coding languages.

The Central Manchester and Manchester Children's University Hospital web site is an example of how Brand Attention applied strict CSS and XHTML standards to provide a site that can be used by those with disabilities

### Accessibility and usability focused code

Brand Attention experts use coding that translates into an accessible web experience via all computers, not just the latest and most expensive. Our code is fully optimised so that your web site is viewable through all the leading Internet browsers.

### Maintenance, hosting and domain/email management

Our web design, search marketing, and mobile site development service can come as a complete package in which we also source the best hosting service, targeted domain and email system for your business.
